

2026 PRODUCT GUIDE

Where Genetics Come First!

FAITH

Here at **Superior Seed**, we strive to operate our company and serve our customers with the highest level of honesty, integrity, and confidence in our product portfolio.

Personally, the principles found in **Colossians 3:23-24** are at the core of our foundation, which says,

“Whatever you do, do it heartily, as to the Lord and not to men, knowing that from the Lord you will receive the reward of the inheritance; for you serve the Lord Christ.”

We also actively support several mission organizations that are working to help bring hope and freedom to hurting people around the world and locally.

Jason and Nicole Fitzpatrick (The Village Global) are a fearless team actively involved in rescuing trafficked children and providing a safe haven for them to be loved and healed of the unthinkable trauma they have experienced. They also operate a drug rehabilitation facility and a Bible school for men. As well as operating a school for the countless children they have rescued. They now have multiple children’s homes and village churches they have established in Central and Southern Mexico. Nicole has recently released a powerful biography entitled “One More Rescue”.

One Child Matters is an outreach ministry we have supported for many years in the Dominican Republic that provides the opportunity to “adopt” children to help provide a solid academic and biblical education as well as nutritional assistance to help equip the next generation of young people to become strong leaders in their community.

Campamento de Dios Mahanaim is a local church and vocational training ministry that not only plants local churches in southern Mexico but is also a group of Mexican national business professionals that have a heart to educate, train, and equip their local people to have a positive influence in the business community through entrepreneurial efforts, establishing local businesses, schools, and professional services.

Greg and Lisa Rider (Going Forth International) are a church planting team reaching out to the unreached people of Oaxaca and Guerrero Mexico, indigenous descendants or Aztec villagers in the mountain regions south of Mexico City to the Pacific Ocean.

FAMILY

As is seen so often in our beloved farming community, strong families make up strong communities. We hold strongly to the traditional family values that were established by God from the very beginning of time. We also believe it is important to link up with and support solid organizations that promote and encourage those same values. We proudly support 4-H, and FFA (Future Farmers of America) in several counties within our marketing area and our local community. As well as any other wholesome activities and organizations that strengthen our family units.

FREEDOM

This great nation, which has afforded us the opportunity to discover and pursue our dreams and goals as a “free society,” is being threatened on multiple fronts. As proud Americans, we must be willing to make a stand for the sake of our children and grandchildren. Let us not be a generation that lets freedom slip through our grasp. I am asking everyone to be courageous, speak up, and speak out for freedom. Be intentional and vote for freedom-minded candidates. Get involved and remind our children and neighbors that “Freedom is not Free”, nor is it cheap. It has been purchased with the blood of generations of patriots before us, so let’s do our part to preserve it.

Dear Valued Customer,

Here we go again! Another “*super challenging*” spring in south-central Indiana! Cold, cloudy days, late freezes, Canadian wildfire smoke, and frequent thunderstorms became all too familiar. Now, as we move beyond first crop planting, many of us are in full swing with side-dressing corn, spraying, replanting, harvesting wheat, and getting double-crop soybeans in the ground. And just to keep it interesting, we’re doing it all under a “heat dome,” with hot, humid conditions that the crops need and love, - the same weather that makes us miserable. What a season!

At **Superior Seed, Inc.**, we’re incredibly grateful to have completed our 15th sales and delivery season as an independent seed company. Because of your continued loyalty, we’ve been able to adapt and grow even as the ag seed industry experiences ongoing change, consolidation, and corporate mergers. Thanks to you, we’ve strengthened our market presence and remained focused on what matters most: *serving farmers right here at home*.

Being fully independent gives us the freedom to make rapid, strategic decisions: choosing the best genetics and trait platforms across the industry. Our “Best Product Strategy” ensures that we evaluate and deliver top-performing corn hybrids, soybeans, and wheat varieties tailored to the needs of your fields. No single brand allegiance, just the best products for the job.

On behalf of my family and our team, thank you for trusting us over the past 15 years. It is an honor to partner with you in your production, and we’re excited about what’s ahead as we grow and serve even more of our region’s farmers.

As you look through our **2026 Superior Seed Product Guide**, you’ll see our complete lineup of elite POWERCORE® corn hybrids and Enlist E3® soybean varieties, as well as our high-performing hybrid wheat selections, known for excellent yield potential, strong scab resistance, heavy test weight, and excellent straw quality. We’d love the chance to connect with you and talk more about which products can bring top-tier performance to your acres.

Thank you again. We’re proud to serve you.

Thankfully yours,
Doug Hardy

CORN TECHNOLOGY

REFUGE ADVANCED®

PCE | PowerCore® Enlist® Refuge Advanced®

PowerCore® Enlist® Refuge Advanced® is a comprehensive trait package for above-ground pests and weed management. PowerCore Enlist corn features three modes of action against above-ground insect pests for broad-spectrum and long-lasting control. Tolerance to multiple herbicides – including glyphosate, glufosinate, 2,4-D choline, and FOPS – gives you the flexibility in herbicide choice and management practices to help maximize yield and now with the added flexibility of integrated refuge.

THE NEW STANDARD FOR WEED CONTROL & YIELD PERFORMANCE

ENLIST® WEED CONTROL SYSTEM

ON-TARGET APPLICATIONS:

90% less drift than traditional 2,4-D
96% less volatile than 2,4-D ester

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use on Enlist® crops.

| 2,4-D choline
| Glyphosate
| Glufosinate

| 2,4-D choline | Glyphosate
| Glufosinate | FOP Herbicides

HERBICIDE

Enlist Duo® COLEX-D® technology

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance

Enlist One® COLEX-D® technology

- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with glyphosate, glufosinate and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

Conventional Corn

From the very beginning of Superior Seed, our conventional hybrid lineup has always been a strong emphasis and is a very important piece in our product portfolio and our market strategy.

In a time when most of the large national brand companies have reduced or are eliminating conventional hybrids from their lineups, we at Superior Seed are intensifying our focus to find the very best hybrids by working with independent breeders and many genetic companies in order to find the **PREMIUM HYBRIDS** to better meet the need and supply the demand of this important segment of our farming

community. We have worked diligently to strengthen our hybrid lineup and we believe **we currently offer the best performing and most diverse genetic portfolio available** anywhere. Superior Seed is proud of becoming known as the premier provider of **PREMIUM CONVENTIONAL CORN HYBRIDS**. Let us work alongside of you to select a package of hybrids specifically chosen for your farming operation. Please take a look at the hybrids listed here and study them in more detail within the pages of this seed guide or on our website at www.SuperiorSeed1.com.

NOW OFFERING! AERIAL DRONE SPRAYING POWERED BY SUPERIOR CROP PILOTS

“

At Superior Seed, we've always believed in giving our customers every advantage in the field. That's why we're proud to announce our new partnership with Superior Crop Pilots: offering cutting-edge drone fungicide application services that help protect your investment, boost yield potential, and minimize risk.

WHY CHOOSE DRONE SPRAYING?

BETTER USE OF PRODUCT

More uniform application and droplet size means improved fungicide efficacy with less waste.

NO HEAVY EQUIPMENT NEEDED

Avoid wet field delays or ruts. Drones don't rely on ground conditions.

REDUCED DRIFT RISK

Ultra-targeted spraying with intelligent flight planning = minimal off-target impact.

CROP HEALTH COMES FIRST

No wheel tracks = no damaged plants or compacted soil. Your stand stays strong and clean.

MORE PRECISE COVERAGE

Drones fly low and slow, targeting only your crop, not your ditches, waterways, or neighboring fields.

**PARTNER WITH A FAMILY-OWNED TEAM THAT KNOWS
YOUR ACRES, YOUR OPERATION, AND YOUR GOALS.**

SOYBEAN PRODUCTS

Enlist E3® Soybeans

Enlist E3® soybeans provide tolerance to new 2,4-D choline, glyphosate and glufosinate.

STS®

herbicide tolerant trait

STS® is a tolerance gene that allows aggressive rates of either Synchrony® XP herbicide or Harmony® SG herbicide tank mixed with glyphosate in post, in-crop applications. This provides a simple, cost-effective weed control option for tough weeds such as lambsquarters, marestail, morning glory, ragweeds, yellow nutsedge, and many other broadleaf or sedge weeds in soybeans. Contact your local DuPont™ agriculture retailer or local sales representative for details. Always read and follow all label directions and precautions for use.

2.7 RM

Maturity 2.7	Pubescence Color Lt. Tawny	Flower Color Purple	Pod Color Brown	Plant Height Med-Tall
Plant Type Med-Bush	Emergence Very Good	Standability Good	Phytophthora Excellent	Standability Good

- Excellent yielding 2.7 RM Peking line with Soybean Cyst Nematode resistance
- Replaces S26E04 by +5.0 BPA with outstanding agronomic scores
- This variety beat P28A65E by +3.6 bpa in multiple yield trial averages
- Excellent plant height with very good standability. Very Good phytophthora with a Rps 1k gene with good SDS tolerance

S29E05 NEW

2.9 RM

Maturity 2.9	Pubescence Color Gray	Flower Color Purple	Pod Color Tan	Plant Height Med-Tall
Plant Type Med-Bush	Emergence Excellent	Standability Very Good	Phytophthora Very Good	Standability Very Good

- "New" high yielding Peking variety with better agronomics and plant height
- Very Good Sudden Death Syndrome scores with more stress tolerance
- Outstanding emergence, with very good standability
- Very Good Phytophthora Root Rot field tolerance, with good White Mold tolerance

S31E35**3.1 RM**

Maturity 3.1	Pubescence Color Gray	Flower Color Purple	Pod Color Brown	Plant Height Med-Tall
Plant Type Med-Bush	Emergence Very Good	Standability Very Good	Phytophthora Very Good	Standability Very Good

- Exciting line that brings yield, stability and health
- Excellent phytophthora field tolerance due to overall health and Rps 1c gene
- This "New" variety is very broadly adapted to all soil types in our sales regions
- This line is a cross between 2 powerful parent lines that have both performed at a very high level. Plant with confidence!

**S33E84****3.3 RM**

Maturity 3.3	Pubescence Color Gray	Flower Color White	Pod Color Tan	Plant Height Medium+
Plant Type Med-Bush	Emergence Very Good	Standability Very Good	Phytophthora Excellent	Standability Very Good

- Outstanding Early Mid-Group 3 bean with top-end yield potential
- High-yielding Peking Soybean Cyst Nematode resistant variety with a unique genetic package
- Excellent stress tolerance and overall agronomics and emergence
- Very strong performance in 2023 and 2024

**S34E45****3.4 RM**

Maturity 3.4	Pubescence Color Lt. Tawny	Flower Color White	Pod Color Brown	Plant Height Medium+
Plant Type Med-Bush	Emergence Very Good	Standability Excellent	Phytophthora Excellent	Standability Excellent

- Mid-Group 3 variety that is a "Step Changer" with big time yields
- Beautiful light tawny plant with excellent standability and plant type
- Solid agronomic package with Excellent Phytophthora field tolerance with Rps 1c gene
- Ranked #1 variety in multiple regional research yield trial breakouts. Don't miss out on this one!

STS®
herbicide tolerant trait

SOYBEAN PRODUCTS

S36E04

3.6 RM

Maturity 3.6	Pubescence Color Gray	Flower Color Purple	Pod Color Brown	Plant Height Medium+
Plant Type Bush	Emergence Excellent	Standability Excellent	Phytophthora Very Good	Standability Excellent

- This variety is sure to get your attention, yield plus agronomics
- Excellent Phytophthora Root Rot field tolerance, very strong Sudden Death Syndrome tolerance
- Excellent emergence and standability with a wide plant type for all row widths
- 2.5 bpa advantage over 36E12 which has been an excellent variety for the past two years

STS®
herbicide tolerant trait

S37E15

3.7 RM

Maturity 3.7	Pubescence Color Lt. Tawny	Flower Color Purple	Pod Color Brown	Plant Height Med-Tall
Plant Type Med-Bush	Emergence Excellent	Standability Good	Phytophthora Excellent	Standability Good

- 3.7 variety with big yields and is also very easy to cut
- Very strong defensive characteristics with yield to spare
- Excellent Phytophthora field protection with Rps 1k gene
- This is truly and outstanding variety for Indiana soils that brings both defensive traits and consistent yield

S38E50

3.8 RM

Maturity 3.8	Pubescence Color Lt. Tawny	Flower Color White	Pod Color Brown	Plant Height Med-Tall
Plant Type Med-Bush	Emergence Excellent	Standability Very Good	Phytophthora Excellent	Standability Very Good

- High yielding 3.8 variety that has "Just Plant Me" written all over it
- This variety is the complete package. Yield, defensive characteristics, disease protection
- #1 variety in the 2024 F.I.R.S.T trials location in Connersville, IN
- Excellent PRR field tolerance with Rps 1k, very good SDS and stem canker resistance

S39E86 NEW

3.9 RM

Maturity 3.9	Pubescence Color Lt. Tawny	Flower Color White	Pod Color Tan	Plant Height Med-Tall
Plant Type Bush	Emergence Excellent	Standability Very Good	Phytophthora Excellent	Standability Very Good

- "New" 3.9-4.0 variety that brings yield, stability and agronomics together in one package
- Very good Frogeye, Phytophthora Root Rot, and Sudden Death Syndrome tolerance and protection
- This variety will move North or South and can handle all soil types
- This is an upright, clean, bushy plant type that has very good standability and harvestability

The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements. To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, Enlist Corn - REFUGE and Enlist E3 seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3 soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.corteva.us/Resources/trait-stewardship.html.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Properly managing trait technology is key to preserving it as a long term crop protection tool. **Growers who fail to comply with IRM requirements risk losing access to this product.** To help preserve the effectiveness of *B.t.* corn technologies, growers planting *B.t.*

corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with *B.t.* technology, including refuge examples and important information on the use of insecticides on refuge and *B.t.* corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/trait-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/espp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING.

ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CORN AND SOYBEANS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. TMTrademarks of Corteva Agriscience and its affiliated companies.

POWERCORE® multi-event technology developed by Corteva Agriscience LLC and Monsanto. LibertyLink® and the Water Droplet Design are registered trademarks of BASF. PowerCore® and Roundup Ready® are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. *B.t.* products may not yet be registered in all states. Check with your seed representative for the registration status in your state. TMTrademarks of Corteva Agriscience and its affiliated companies.

PowerCore® multi-event technology developed by Corteva Agriscience LLC and Monsanto. POWERCORE® is a registered trademark of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. *B.t.* products may not yet be registered in all states. Check with your seed representative for the registration status in your state.

STS®

herbicide tolerant trait

This variety contains a trait providing enhanced tolerance to labeled specific sulfonylurea soybean herbicides. The STS® gene will not safeguard this variety against other herbicide chemistries which are labeled to be used only over-the-top of crops that have a different and specified herbicide resistant gene. Always read and follow herbicide directions prior to use.

Not all herbicides are registered for sale or use in all states or counties in the United States or all provinces in Canada. Contact your local regulatory agency to determine if a product is registered for sale or use in your area. Always read and follow label directions.

ACCIDENTAL APPLICATION OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS. YOU MUST SIGN A TECHNOLOGY USE AGREEMENT AND READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.

The purchase of these seeds includes a limited license to produce a single soybean crop in the United States (or other applicable country). The use of seed from such a crop or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. Resale or transfer of the seed is strictly prohibited.
